2. User Login Story

No character data can be found in the user's data:
- All the user data will be set to default and cannot be updated.
-

Design physical attributes screen:
- Two-fifths of the screen on the left will be filled with a basic character.
- There will be five different buttons for categories that the user can toggle between: Body, Face, Hair, Accessories, and Outfits. Once a category button is selected, different options will be available to customize the character. The character will update as options are selected.
- They can also fill out a form on the top right with their zip code to update the location for the weather API.
- Once the user presses the "continue" button on the top right screen, they will be brought to the user Login Customization story.
